The Iron Yard- Charlotte, NC

May 2016

Front-End Engineering

Flaming Tires Auction - *AngularJS-built classic car auction app utilizing a custom built API*

Created using: HTML5, CSS3, JavaScript built on an Angular framework

Features: Classic car auction site which allows users to discover upcoming auctions offered from Flaming Tires, as well as searching through available consignment cars in the upcoming auction.

Site: <http://flamingtires.surge.sh>

GitHub: <http://github.com/ccgriswold/ReadySetAuction>

Weight Of The World News - *Breaking news app that implements AngularJS to gather data APIs*

Created using: HTML5, CSS3, JavaScript built on an Angular framework

Collaboration with: Deems Wilson

Features: News app in which users can browse news articles, filter interests, and view previously saved articles.

Site: <http://weightofworldnews.surge.sh>

GitHub: <http://github.com/ccgriswold/WeightoftheworldNewsApp>

Space Race Taxi - *Backbone-built grid based game where users select a ship and move towards an objective.*

Created Using: HTML5, CSS3, JavaScript, Underscore built on a Backbone Framework

Features: Grid based game where users choose a ship and move towards the next objective. With each position moved, user loses fuel and after each objective reached, fuel is replenished by random amount.
